DETAILED ACTION

This Office action is in response to the amendment filed September 25, 2003.

1. The rejection under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over OTA et al is **withdrawn** in view of the amendment by applicants.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by GASCHLER et al.

The claimed invention is now drawn to a radiation sensitive composition comprising a resin composition and a radiation sensitive material, wherein the resin composition comprises two or more kinds of resins of (a) as recited in claim 1.

GASCHLER et al anticipates the claimed invention at Examples 1 and 5 by disclosing a binder mixture in a photosensitive composition comprising a novolak resin and a hydroxystyrene in Example 2 which meets the claimed polystyrene derivative, while Examples 5 discloses a binder mixture of novolak and a styrene/acrylate copolymer. These examples anticipate the claimed invention. No claims are allowed.

Art Unit: 1752

4. Claims 4-9, and 11-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the references of record disclose the claimed photosensitive composition having the binder mixture with a quinonediazide compound present in the composition.

5. Claims 3 and 16-26 are allowed.

None of the references of record disclose the claimed photosensitive composition having a quinonediazide compound with the claimed binder mixture.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Chu whose telephone number is (703) 308-2298. The examiner can normally be reached on Monday - Friday from 9:30 am to 6:00 pm.
